

	source corpus	seed layer	paraphrase layer	release views	
Execution validation	gate	source	n/a	source	Qiskit execution; materialized circuits; OpenQASM export
Benchmark readiness	gate	source	n/a	source	n/7 and n/8 readiness gates
Metadata design	gate	audit	audit	gate	27 additive governance and split fields
Acceptance gate	n/a	gate	gate	audit	209 accept / 47 rewrite pilot adjudication
Remediation	n/a	audit	gate	audit	282 rewrite-tail and lineage-neighbor results
Semantic diversity	n/a	source	gate	audit	BERTScore, BLEU, ROUGE-L, edit distance
Language audit	n/a	audit	gate	audit	550,300 / 550,314 inputs resolved as English
Release integrity	source	audit	audit	gate	no no-license or missing-license rows in public views

Layers are shown by where they annotate or constrain the dataset object;
hard gates control public-release eligibility.
